CSCMTM
CERTIFIED SUPPLY CHAIN MANAGER

ABOUT CSCM CERTIFICATION

This program provides the knowledge that helps to achieve profitability through Supply Chain efficiency and responsiveness. It is designed combining theory with current industry practice providing an expert insight and support for daily SCM decisions. The time-tested principles allow you to fit your supply chain strategy with the overall business objectives & extend the scope throughout its partners and channel members. The body of knowledge clearly defines the rules of the game and their application distinguishes the winner from the incompetents.

It provides extensive overview as well as detailed analysis for demonstrated improvement in business results. In addition to the SCM body of knowledge, an introduction to business improvement tools such as Lean, Six Sigma and Theory of Constraint is included in the training.

WHY CSCM CERTIFICATION?

There are many factors to consider when contemplating whether to get a professional Supply Chain certification, but experts agree: certifications are excellent qualifications that will most likely set you apart from the competition when searching for a job. Certifications are increasingly becoming a prerequisite in Supply Chain careers. If confronted with two candidates of equal experience, one of which has a formal certification, a recruiter will almost certainly opt for the certified individual. It's all about risk mitigation.

This program demonstrates your knowledge and organizational skills by enhancing your expertise in the Supply Chain Management practices. This certification gives you an in depth understanding of how supply chain is integrated in areas of planning, manufacturing and delivering the product.

Benefits:

- Increases your hiring potential and gives you an advantage over your peers.
- Expands your professional knowledge and skills in supply chain management.
- Highlights your expertise in the operational skills of supply chain management.
- Demonstrates your capability to analyze, design and implement change across the global supply chain activities.
