PGDSCM

**POST GRADUATE DIPLOMA IN
SUPPLY CHAIN MANAGEMENT**

ABOUT PGDSCM CERTIFICATION

This unique post graduate diploma program provides an excellent opportunity for vertical growth. Through this course, students/participants are expected to acquire professional competencies in various aspects of Supply Chain management that would help them leading to an improvement in their job skills and self enrichment. The PGDSCM begins by laying the foundation for a comprehensive understanding of what supply chain management is and how it can be effectively utilized to create better customer experience and thereby making more profit for the supply chain. The program further examines different Supply Chain Management strategies and methods of managing demand and supply, forecasting, aggregate planning, network design etc. Finally, by applying the knowledge successful PGDSCMs are expected to work and lead future supply chain management at home and abroad.

**Approved by IISB
(ISCEA International Standard Board)**

In the recent years, logistics has played an increasingly important role within the corporate world. Its strategic potential can no longer be ignored; it holds the potential for creating value for the end customer and differentiating the company strategically in terms of services rendered. Making a product available to the consumer at the Right Place and the Right Time is critical for the survival and growth of modern enterprises. With concepts such as sourcing, materials & logistics management and manufacturing, planning & control being covered in depth, students are fully equipped to tackle the complexities of Supply Chain. The program aims to develop skills for professionals and equip them to optimize organization profitability through effective management of Supply Chain.
